

DELUXE PINE PLAY AREA BARK

The Deluxe Pine Play Area Bark is simply the finest, most attractive play grade bark certified to BSEN 1177 1998 standards, available in the UK. Its rigorous manufacturing process removes 99% of all white wood and the naturally occurring whispier bark particles, transforming the regular Pine Play Area Bark into a highly attractive and uniform product. As well as making for a more attractive product, the additional layers of screening the product goes through, improves drainage and can extend the products lifespan by up to 50%. These bark chippings are not just suited to Play Areas and offer highly attractive, well performing and long lasting mulching properties in prestigious flower or shrub beds.

Product Benefits

- Highly uniform and attractive bark chippings
- Extra long lasting
- Rich attractive colours
- Suitable for use on borders
- Clean and free draining
- Easy to spread and maintain
- Produced from 100% natural and environmentally friendly sources
- Available bagged or in bulk loads
- Minimal dust and fines
