

# PINE PLAY AREA BARK

Our 20-40mm sized pine play area bark chippings are fully certified to BSEN 1177 2008 and are commonly used in public installations by local authorities nationwide. Pine Play Bark is a rich, colourful and attractive bark with non staining and frost resistant properties. Pine's unique properties make it free draining and easily maintainable. As well as being a top quality play grade product, Pine Play Bark is also among the highest performing bark mulch on the market making it ideal for beds and borders, with ericacious plants specifically enjoying it's natural low pH level.
