

The image shows a close-up of softwood play grade chip, which consists of small, irregular pieces of light-colored wood. The chips are piled together, creating a textured surface. The background is a solid green color.

SOFTWOOD PLAY GRADE CHIP

Softwood play grade chip is a fully certified and tested playground safety surface to BSEN 1177 2008 standards. It is a natural creamy colour and made from 100% British softwood. A popular choice in play grounds and local authority installations due to its keen pricing and clean appearance; making this a trusted economic alternative to play barks. Softwood chip is sourced from saw mills across the country and goes through a rigorous screening process to remove the products fines and dangerous oversized material.

Product Benefits

- Economical
- Clean and free draining
- Produced from 100% natural and environmentally friendly sources
- Attractive appearance
- Uniform colour
- Available bagged or in bulk loads

TECHNICAL INFORMATION
